European Technical Assessment **ETA 07/0280 of 31/10/2024**

GENERAL PART

Trade name of the construction product	FASSATHERM CLASSIC
Product family to which the construction product belongs	PAC 04: THERMAL INSULATION PRODUCTS. COMPOSITE INSULATING KITS/SYSTEMS External Thermal Insulation Composite Systems (ETICS) with renderings
Manufacturer	Fassa S.r.l. via Lazzaris, 3 31027 Spresiano (TV) - Italy
Manufacturing plant	Plants: n. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 See Annex A1
This European Technical Assessment contains:	32 pages, including 25 annexes which form an integral part of this assessment
This European Technical Assessment is issued in accordance with Regulation (EU) n° 305/2011, on the basis of	EAD 040083-00-0404 – External Thermal Insulation Composite Systems (ETICS) with renderings
This version replaces	ETA 07/0280 (version 02) of 26/03/2020

The European Technical Assessment is issued by ITAB/ITC-CNR in Italian and English language. Translations of this European Technical Assessment into other languages shall fully correspond to the original issued document and should be identified as such. Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction can be made with the written consent of ITAB/ITC-CNR (issuing Technical Assessment Body). In this case partial reproduction has to be designated as such.

SPECIFIC PARTS

1. TECHNICAL DESCRIPTION OF THE PRODUCT

The product "FASSATHERM CLASSIC" is an External Thermal Insulation Composite System (ETICS) with renderings (rendering system) to be applied as external thermal insulation on the walls of buildings. The walls are made of masonry (bricks, blocks, stones) or concrete (cast on site or as prefabricated panels) with or without rendering systems.

The ETICS kit comprises prefabricated insulation products of expanded polystyrene (EPS) to be bonded to the wall with supplementary adhesive on 50% of the surface. The methods of fixing and the relevant components are specified in Table 1.

The insulation products are faced with a rendering system consisting of one or more layers (site applied), one of which contains reinforcement. The rendering system is applied directly to the insulating boards, without any air gap or disconnecting layer.

1.1 Components of the kit "FASSATHERM CLASSIC"

The components of the kit, as specified by the manufacturer, are reported in Table 1.

Table 1: Components of the kit

Components (see Annexes A3-A9 for further description, characteristics and performances of the components)		Quantity	Thickness [mm]
Bonded system with supplementary mechanical fixing and mechanically fixed ETICS with supplementary adhesive (according to manufacturer's instructions bonded surface is $\geq 50\%$). National application documents shall be taken into account.			
Insulation material with associated method of fixing	Insulation product 1: "EPS 80" expanded polystyrene white panel according to EN 13163 (see Annex A3)	//	40-300
	Insulation product 2: "EPS 100" expanded polystyrene white panel according to EN 13163 (see Annex A4)	//	40-300
	Insulation product 3: "EPS 120" expanded polystyrene white panel according to EN 13163 (see Annex A5)	//	40-300
	Insulation product 4: "EPS con grafite" expanded polystyrene panels with addition of graphite according to EN 13163 (see Annex A6)	//	40-300
	Insulation product 5: "EPS TR 100" expanded polystyrene white panel according to EN 13163 (see Annex A7)	//	40-300
	Insulation product 6: "EPS con grafite TR 100" expanded polystyrene panel with addition of graphite according to EN 13163 (see Annex A8)	//	40-300
	Adhesive 1: "A50" (cement based powder requiring addition of 22-24 % of water); particle size: 0.6 mm	all the surface: 3.0 - 5.0 points: 3.0 - 4.0	//
	Adhesive 2: "A96" (cement based powder requiring addition of 25-27 % of water) particle size: 1.2 mm	all the surface: 3.0 - 5.0 points: 3.0 - 4.0	//

	Adhesive 3: "AL88" (cement based powder requiring addition of 30-34 % of water); particle size: 1.2 mm Anchors: "FASSA TOP FIX 2G"; "FASSA COMBI FIX PLUS"; Properties equal or higher than those reported in Table A9 of Annex A9	all the surface: 3.0 - 5.0 points: 3.0 - 4.0	//
		6/m ²	//
Base coat	Base coat 1: "A50" (cement based powder requiring addition of 22 - 24 % of water); particle size: 0.6 mm	5 - 6	3.0 - 5.0
	Base coat 2 "A96" (cement based powder requiring addition of 25 - 27 % of water); particle size: 1.2 mm	6 - 7	4.0 - 5.0
	Base coat 3 "AL88" (cement based powder requiring addition of 30 - 34 % of water); particle size: 1.2 mm	5 - 6	4.0 - 5.0
Reinforcement	Standard Glass fibre mesh "FASSANET 160" mesh size: 4.0 x 4.5 mm ± 0.5 mm. Mass per unit area: 160 g/m ²	//	//
Key coat	Key coat 1 (to be used with finishing coat 1): "FA 249" water based product.	30-50 g/m ²	100 - 120 µ
	Key coat 2 (to be used with finishing coat 2): "FS 412" water based product	100-150 g/m ²	100 - 120 µ
	Key coat 3 (to be used with finishing coat 3) "F 328" watery solution of potassium silicate and acrylic resins	100-150 g/m ²	100 - 120 µ
	Key coat 4 (to be used with finishing coat 4): "FX 526" White or pigmented filler	100-150 g/m ²	100 - 120 µ
Finishing coat	Ready to use paste - acrylic resin binder to be used with the key coat of the same number		
	Finishing coat 1: " RTA 549 " acrylic copolymer Particle size 1.2 mm; 1.5 mm; 2.0 mm; 3.0 mm	2.2 - 4.6 kg/m ²	1.0 - 3.0
	Finishing coat 2: " RSR 421 " Acrylic copolymer-silicone resin blend Particle size 1.2 mm; 1.5 mm; 2.0mm; 3.0 mm	2.2 - 4.6 kg/m ²	1.0 - 3.0
	Finishing coat 3 " R 336 " (ready to use paste based on potassium silicate and acryl resins); particle size: 1.0 mm; 1.5 mm; 2.0 mm; 3.0 mm	2.2 - 4.6 kg/m ²	1.0 - 3.0
	Finishing coat 4 " RX 561 " Acrylic - polysiloxane copolymer blend" Particle size 1.2 mm; 1.5 mm; 2.0mm; 3.0 mm	2.2 - 4.6 kg/m ²	1.0 - 3.0
Decorative coat (Optional)	Desideri Velluto (Siloxane-enhanced smooth coating with a mineral appearance) Particle size 0.3 mm	Ca. 2.5 kg/m ²	Ca. 0.9

2. SPECIFICATION OF THE INTENDED USE IN ACCORDANCE WITH EUROPEAN ASSESSMENT DOCUMENT N°040083-00-0404 (hereinafter EAD)

The "FASSATHERM CLASSIC" is intended to be used on new or existing (retrofit) vertical building walls. The ETICS may also be used on horizontal or inclined surfaces which are not exposed to precipitation.

The ETICS gives the building wall to which it is applied additional thermal insulation and protection from effects of weathering. ETICS are non-load-bearing construction elements. They do not contribute directly to the stability of the building wall on which they are installed.

ETICS are not intended to ensure the air tightness of the building structure.

Concerning product packaging, transport and storage it is the responsibility of the manufacturer to undertake the appropriate measures and to advise his clients on the transport and storage, as he considers necessary in order to reach the declared performances.

The information about installation is provided with the technical documentation from the Manufacturer and it is assumed that the product will be installed according to it or (in absence of such instructions) according to the usual practice of the building professionals.

The performances assessed in this European Technical Assessment, according to the applicable EAD, are based on an assumed intended working life of at least 25 years, provided that the conditions for packaging, transport, storage, installation as well as appropriate use, maintenance and repair are met. The indications given on the working life cannot be interpreted as a guarantee given by the manufacturer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3. PERFORMANCE OF THE PRODUCT AND REFERENCES TO THE METHODS USED FOR ITS ASSESSMENT

The tests for performance assessment of "FASSATHERM CLASSIC" were carried out in compliance with EAD 040083-00-04040 according to the test methods reported herein, as well for what concerns sampling, conditioning and testing provisions.

The performances of the kit as described in this chapter are valid provided that the components of the kit comply with Section 1 of the ETA and the relative Annexes A3–A9.

The numbering (#) in the following tables corresponds to the numbering of Table 1 of EAD 040083-00-0404

3.1 SAFETY IN CASE OF FIRE (BWR 2)

#	Essential characteristic	Performance
1	Reaction to fire	
	- Reaction to fire of ETICS (EPS max density $15 \pm 6\% \text{ kg/m}^3$)	Euroclass B – s1, d0 (see Annex B1, Tables B1 and B2).
	- Reaction to fire of ETICS (EPS max density $20 \pm 6\% \text{ kg/m}^3$)	Euroclass B – s2, d0 (see Annexes B1 and B2, Tables B1 and B2).
	- Reaction to fire of thermal insulation material	Euroclass E.
	- Reaction to fire of PU foam adhesive	Not applicable.
2	Façade fire performance	No performance assessed.
3	Propensity to undergo continuous smouldering of ETICS	No performance assessed.

3.2 HYGIENE, HEALTH AND THE ENVIRONMENT (BWR 3)

#	Essential characteristic	Performance
4	Content, emission and/or release of dangerous substances – leachable substances	No performance assessed.
5	Water absorption	
	- of the base coat and the rendering system	See Annexes B3 and B4; Tables B3 and B4
	- of the thermal insulation product	See Annex B12, Table B16.
6	Water-tightness of the ETICS: Hygrothermal behaviour	The ETICS passed the test without defects. The system FASSATHERM CLASSIC is resistant to hygrothermal cycles. <i>Hygrothermal cycles have been performed on a rig.</i>
7	Water-tightness: Freeze thaw performance	See Annex B4, Table B5.
8	Impact resistance	See Annex B5, Tables B6 and B7; Annex B6, Table B8.
9	Water vapour permeability	
	- of the rendering system	See Annex B7, Table B9 Annex B8, Table B10.
	- of the thermal insulation product	See Annex B8, Table B11.

3.3 SAFETY AND ACCESSIBILITY IN USE (BWR 4)

#	Essential characteristic	Performance
10	Bond strength	.
	- Bond strength between the base coat and the thermal insulation product	See Annex B9, Table B12.
	- Bond strength between the adhesive and the substrate	
	- Bond strength between the adhesive and the thermal insulation product	
	- Bond strength of foam adhesives	Not applicable.
11	Fixing strength (transverse displacement test)	Not applicable.
12	Wind load resistance of ETICS	
	- pull-through tests of fixings	See Annex B10, Table B13.
	- static foam block test	Not applicable.
	- dynamic wind uplift test	Not applicable.
13	Tensile test perpendicular to the faces of the thermal insulation product	
	- in dry conditions	See Annex B15, Table B20.
	- in wet conditions	Not applicable.
14	Shear strength and shear modulus of elasticity test of ETICS	See Annex B15, Table B21.

#	Essential characteristic	Performance
	- Shear strength	
	- Shear modulus of elasticity	
15	Pull-through resistance of fixings from profiles	Not applicable.
16	Render strip tensile test	FASSANET 160 with A 50 W_{rk} warp = 0.24 mm W_{rk} weft = 0.37 mm Simplified method.
		FASSANET 160 with A 96 W_{rk} warp = 0.23 mm W_{rk} weft = 0.17 mm Simplified method.
		FASSANET 160 with AL 88 W_{rk} warp = 0.14 mm W_{rk} weft = 0.20 mm Simplified method.
17	Shear strength and shear modulus of foam adhesive	Not applicable.
18	Post expansion behaviour of foam adhesives	Not applicable.
19	Bond strength after ageing	
	- bond strength after ageing of finishing coat tested on the rig	See Annex B11, Table B14. See Annex B12, Table B15. See Annex B13, Table B17.
	- bond strength after ageing of finishing coat not tested on the rig	See Annex B14, Table B18.
20	Mechanical and physical characteristics of the mesh	
	- Tensile strength of the glass fibre mesh	See Annex B15, Table B19.
	- Protection of metal mesh	Not applicable.

3.4 PROTECTION AGAINST NOISE (BWR 5)

#	Essential characteristic	Performance
21	Airborne sound insulation of ETICS	No performance assessed.
	Dynamic stiffness of the thermal insulation product	No performance assessed.
	Air flow resistance of the thermal insulation product	No performance assessed.

3.5 ENERGY ECONOMY AND HEAT RETENTION (BWR 6)

#	Essential characteristic	Performance
22	Thermal resistance and thermal transmittance of ETICS	See Annex B16, Table B22.

4. ASSESSMENT AND VERIFICATION OF CONSTANCY OF PERFORMANCE (AVCP) SYSTEM APPLIED, WITH REFERENCE TO ITS LEGAL BASE

In accordance with the European Assessment Document EAD No. 040083-00-0404, the applicable European legal act is: **Commission Decision 97/556/EC**.

The system of assessment and verification of constancy of performance (AVCP) is **2+**.

In addition, with regard to reaction to fire for products, the applicable European legal act is **Commission Decision 97/556/EC**, as amended by **Commission Decision 2001/596/EC**.

The system of assessment and verification of constancy of performance (AVCP) is **2+**.

5. TECHNICAL DETAILS NECESSARY FOR THE IMPLEMENTATION OF THE AVCP SYSTEM, AS PROVIDED FOR IN EAD 040083-00-0404

Technical details necessary for the implementation of the AVCP system are laid down in the Control Plan deposited at ITAB/ITC-CNR.

**Issued in San Giuliano Milanese, Italy on 31/10/2024

1) Performance not declared by the manufacturer but measured in Table B21 of Annex B15.

FASSATHERM CLASSIC

Product Description – Thermal insulation product - EPS con grafite TR100

**Annex A8
of ETA N° 07/0280**

Table A9: Anchors product characteristics

Trade name ⁽¹⁾	ETA reference	Description	Size [mm]	Plate stiffness [kN/mm]	Minimum characteristic resistance to tension loads (pull-out from substrate) ⁽²⁾ [kN]
EJOT STR U 2G	ETA-04/0023 (5/06/2023)	Screw-in high-density polyethylene (HDPE) anchor with the pin made of galvanized steel	Plate diameter: 60 Ø nail: 8	0.60	0.6
EJOTHERM H2 ECO	ETA-15/0740 (01/12/2016)	Screw-in high-density polyethylene (HDPE) anchor with the pin made of galvanized steel	Plate diameter: 60 Ø nail: 8	0.97	0.5

(1) Other anchors can be used, provided they have plate dimension and stiffness equal or higher than those reported in this table.
(2) These values show the minimum characteristic resistance to tension loads (pull-out from substrate) of the anchor in the weakest support (enclosed in the relative ETA). Other higher values appear in the relative ETAs.

FASSATHERM CLASSIC

Product Description – Anchors product characteristics

**Annex A9

FASSATHERM CLASSIC

Performances – Tensile strength of the glass fibre mesh, tensile strength, shear strength and shear modulus of elasticity of thermal insulation products

**Annex B15
of ETA N° 07/0280**

Table B22: Thermal resistance and thermal transmittance of ETICS

Product	Minimum thickness [mm]	Thermal resistance [m ² K/W]
EPS 80	40	1.08
EPS 100	40	1.11
EPS 120	40	1.18
EPS con grafite	40	1.29
EPS TR 100	40	1.11
EPS con grafite TR 100	40	1.29

The additional thermal resistance provided by the ETICS (R_{ETICS}) to the substrate wall is calculated from the thermal resistance of the thermal insulation product ($R_{insulation}$), determined in accordance with 2.2.23.1, and from either the tabulated R render value of the render system (R_{render} is about 0.02 m²K/W) or R_{render} determined by test according to EN 12667 or EN 12664 (depending on expected thermal resistance).

$$R_{ETICS} = R_{insulation} + R_{render} \text{ [(m}^2\text{K)/W]}$$

as described in EN ISO 10456.

The thermal bridges caused by mechanical fixing devices influence the thermal transmittance of the entire wall and shall be taken into account using the following calculation:

$$U_c = U + \Delta U \text{ [W/(m}^2\text{K)]}$$

With: U_c corrected thermal transmittance of the entire wall, including thermal bridges

U thermal transmittance of the entire wall, including ETICS, without thermal bridges

$$U = \frac{1}{R_{ETICS} + R_{substrate} + R_{se} + R_{si}}$$

$R_{substrate}$ thermal resistance of the substrate wall [(m².K)/W]

R_{se} external surface thermal resistance [(m².K)/W]

R_{si} internal surface thermal resistance [(m².K)/W]

ΔU correction term of the thermal transmittance for mechanical fixing devices

= $\chi_p * n$ (for anchors) + $\sum \psi_i * l_i$ (for profiles) (formula for U_c)

χ_p point thermal transmittance value of the anchor [W/K]. If not specified in ETA for anchors, the following values apply:

= 0.002 W/K for anchors with a plastic screw/nail, stainless steel screw/nail with the head covered by at least 15 mm plastic material, or with a minimum 15 mm air gap at the head of the screw/nail.

= 0.004 W/K for anchors with a galvanized carbon steel screw/nail with the head covered by at least 15 mm a plastic material or a minimum 15 mm air gap at the head of the screw/nail.

= 0.008 W/K for all other anchors (worst case)

n number of anchors per m². In case n is more than 16, the formula for U_c is not applied.

ψ_i linear thermal transmittance value of the profile [W/(m.K)]

l_i length of the profile per m².

The influence of thermal bridges can also be calculated as described in EN ISO 10211.

It shall be calculated according to this standard if there are more than 16 anchors per m² foreseen. The declared χ_p -values do not apply in this case.
